

Project Design Phase-I
Proposed Solution

Date	19 September 2022
Team ID	PNT2022TMID10029
Project Name	AI-based localization and classification of skin disease with erythema
Maximum Marks	2 Marks

Proposed Solution :

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	To Create an application for Skin disease detection purpose using AI.
2.	Idea / Solution description	We will be developing the AI used application to detect the skin disease by capturing the infected area.
3.	Novelty / Uniqueness	Fast mode to identify the type of skin disease and highly accurate.
4.	Social Impact / Customer Satisfaction	It helps the person to get the quick result and fast consulting.
5.	Business Model (Revenue Model)	This application helps the people to identify the seriousness about the disease and to find what kind of skin disease it is.
6.	Scalability of the Solution	This use of application will reach all the peoples who were affected with skin disease globally to get the quick report about their skin.
